DETAILED ACTION

1. This communication is in response to Applicant's amendment filed on august 5, 2005. Claims 1, 4-6, and 8-10 are pending in this application.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter:

4. The prior art of record (Walker et al. US Pat. No. 5,794,207) teaches a method and apparatus for effectuating bilateral buyer-driven commerce that allows prospective buyers of goods and services to communicate a binding purchase offer globally to potential sellers, for sellers conveniently to search for relevant buyer purchase offers, and for sellers potentially to bind a buyer to a contract based on the buyer's purchase offer. The apparatus of the present invention includes a controller which receives binding purchase offers from prospective buyers, the controller makes purchase offers available globally to potential sellers. Potential sellers then have the option to accept a purchase offer and thus bind the corresponding buyer to a contract.

Even though, the prior art of record teaches method and apparatus for effectuating bilateral buyer-driven commerce for performing the above mentioned steps, the prior art of record fails to teach a marketing system for processing market information of consumers and dealers via an electronic network comprising a posting unit for extracting and posting a non-binding market

information registered in the market information registering unit while withholding from the dealers a portion of the personal information of the consumer necessary for a dealer to identify and contact the consumer about the viewed market information, a personal information acquiring unit purchasing and acquiring for a dealer, after the dealer has viewed the posted market information, the previously withheld portion of the personal information of the consumer necessary for the dealer to identify and contact the consumer about the viewed market information, an access confirming unit seeking approval for access by the dealer from the consumer who registered the purchased market information, when said prior approval demand determining unit judges that the prior approval is required, an information extracting unit extracting, from the registered personal information, personal information to be disclosed to the dealer when access approval is confirmed, and a pickup processing unit permitting the dealer to pickup the personal information extracted by the information extracting unit and wherein said access confirming unit cancels the purchase of the personal information by the dealer when the consumer does not approve the dealer's access.. For these reasons claim 1 is deemed to be allowable over the prior art of record, and claims 4-6, and 8-10 are allowed by dependency.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.
